

PHOTOBOOKS

PHOTOBOOK SOFTWARE USER MANUAL - Quick Start Guide

Step #	Screen View
1. Install the software from the CD.	
2. Create a folder on your hard drive that has the photos you want to put in the photobook, preferably renamed in the order in which they will go in the album. Double click the Creative Photos icon on the desktop. If you are on Vista you may need to access thru the Start menu (start->all programmes->Creative Photos->Creative Photos)	
3. Open the software and click on Create new album	
6. Select your photobook size -> Next	
4. Browse your folder directory and select the folder that contains the photobook images.	
5. Click All pictures to load all the images into the software -> Next	
8. Choose either Manual Composition -> you will need to add the pictures manually yourself - or Automatic Composition - all the pictures will be loaded for you. You can edit pages once they are loaded	

<p>9. Enter a name for the project -> Continue</p>	
<p>10. From there you can edit individual pages & text till you have the album as you want it -> Continue</p>	
<p>11. If you are happy with the layout -> Preview. Your album will be displayed as pages. If you are happy ->continue</p>	
<p>13. Enter your details ->Next . Check your details -> Confirm. Select the destination of your file, whether CD, hard drive or flash drive/memory card or to transfer the photobook file by internet transfer (see the full instructions for this)</p>	
<p>14. Post or drop off file to Yes Photo & Digital Yes Photo & Digital 14 Helwick Street Wanaka Yes Photo & Digital PO Box 429 Wanaka</p>
